Interactive Tourism App Inspired by
the Japanese “Eki Stamps”
Experience

Concept

A digital tourism application designed to encourage visitors to explore cultural and tourist attractions by collecting digital badges at each location.

How It Works

- Each tourist or cultural site has a QR Code.
- Visitors open the app, scan the code, and instantly unlock a unique badge representing that site.
- With every badge or point collected, users progress through different achievement levels.
- Once visitors reach a certain number of badges or points, they receive a real reward such as a free ticket, discount, or access to an additional paid attraction.
- Users can track their journey through an interactive map or achievement dashboard, and share their progress easily on social media.

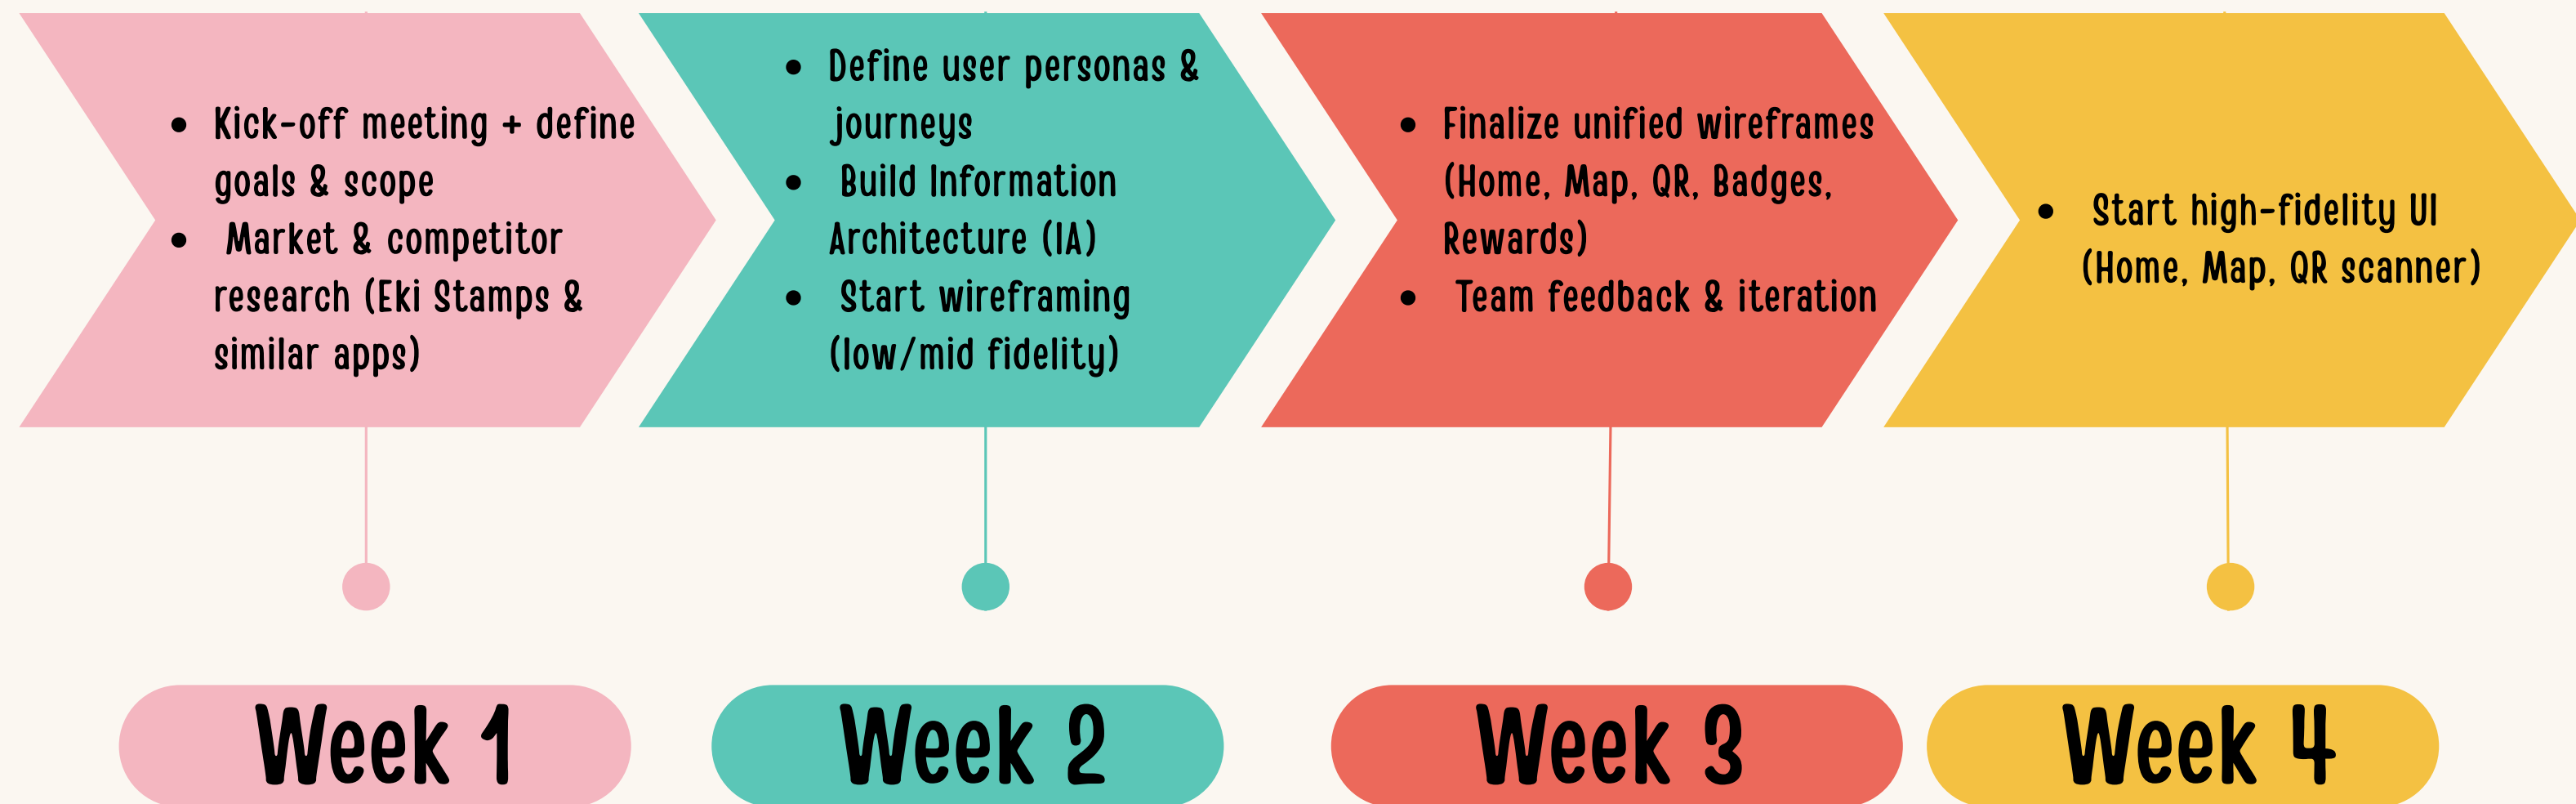

Timeline

End
15 Nov, 2025

Start
15 Aug, 2025

Work plan

-
- Continue high-fidelity UI (Badges collection + Rewards dashboard)

Week 5

- Badge design (unique icons/illustrations)
- Define design style (colors, typography, components)

Week 6

- Build interactive prototype in Figma (main flow)
- Design social sharing screens

Week 7

- Usability testing (small test group)
- Collect feedback & refine UI

Week 8

-
- Apply feedback + polish UI
 - Add animations & micro-interactions

Week 9

- Prepare Design System draft (colors, fonts, buttons, icons)

Week 10

- Finalize design system + assets
- Developer handoff (Figma + documentation)

Week 11

- Buffer week (fixes, QA, last adjustments)
- Prepare presentation/demo package

Week 12

Work team & Roles

Menna Mohamed

Team Leader & UI Designer

Nadeen Elsayed

UI Designer

Maram Elsayed

UX Researcher

Sohaila Elsayed

UX Designer

Amira Ayman

UX Writer

CHALLENGES

• TECHNICAL

- Securing QR codes & preventing misuse.
- Balancing points and rewards system.
- Ensuring smooth map & app performance.

• USER-RELATED

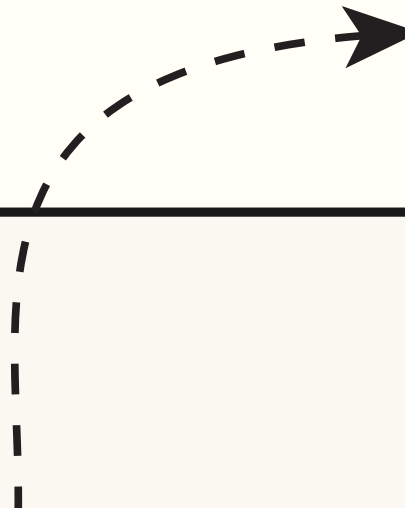

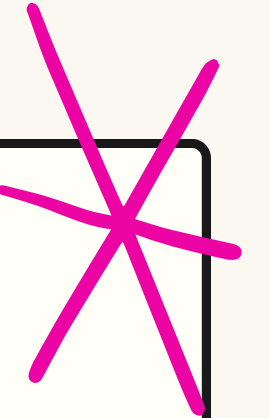

- Simple onboarding for new users.
- Maintaining engagement & retention.
- Encouraging social media sharing.

• OPERATIONAL

- Partnering with tourism & cultural sites.
- Keeping location data updated.
- Providing attractive & sustainable rewards.

• FINANCIAL & BUSINESS

- Funding development & operations.
- Defining a clear revenue model.
- Scaling gradually across regions

THANK YOU!
